

MUHAMMED KHALID

SENIOR FRONTEND DEVELOPER

Mohamedkhaled303110@gmail.com | +201551109704 | LINKEDIN

PROFILE

Senior Frontend Developer (Angular) with 5+ years of experience delivering scalable, high-performance web and cross-platform applications. Experienced in frontend architecture, performance optimization, and mentoring teams. Expert in Angular, RxJS, Signals, and Ionic, with production deployments across Web, iOS, and Android at scale.

EXPERIENCE

SENIOR FRONTEND DEVELOPER | CAELUM GROUP GMBH

FEB 2026 - PRESENT

- Leading frontend architecture for scalable Angular applications in a distributed environment
 - Implementing micro frontend architecture using Module Federation
 - Driving performance optimization (lazy loading, code splitting, caching) across projects
 - Building reusable component libraries and enforcing design system consistency
 - Mentoring developers and leading code reviews to ensure high code quality
- Stack: Angular, Microfrontends, Module Federation, Signals, SignalR, TypeScript

SENIOR FRONTEND DEVELOPER | DYNE

DEC 2023 - FEB 2026

- Led development of scalable cross-platform applications (Web, iOS, Android) using Angular, Ionic, and Capacitor
 - Owned frontend architecture with modular design and structured state management
 - Implemented real-time features via Pusher & optimized performance (lazy loading, caching, bundle size)
 - Integrated payment gateways and ensured secure, reliable checkout flows
 - Managed mobile build and release pipelines for App Store and Google Play
 - Mentored developers, led code reviews, collaborated cross-functionally to deliver high-quality products
- Stack: Angular, Ionic, Capacitor, RxJS, Pusher, Payment Gateways

FRONTEND DEVELOPER | FREELANCER

JUL 2021 - PRESENT

- Delivered web and mobile applications using Angular, React, and Ionic for multiple clients
 - Built and deployed end-to-end Ionic applications (UI, API integration, testing, and store publishing)
 - Integrated third-party services such as Firebase and Stripe for authentication, payments, and real-time features
 - Translated business requirements into responsive, high-performance user interfaces and managed client communication
- Stack: Angular, React, Ionic, Firebase, Stripe, TypeScript

FRONTEND | CROSS-PLATFORM DEVELOPER | SYADTECH

APR 2022 - DEC 2023

- Developed cross-platform mobile applications using Angular and Ionic integrated with REST APIs
 - Built reusable UI components and improved modular architecture for scalable feature development
 - Integrated native device capabilities via Capacitor/Cordova (camera, storage, notifications)
 - Optimized performance for low- and mid-range devices and handled production releases
- Stack: Angular, Ionic, Capacitor/Cordova, RxJS, REST APIs

EDUCATION

BACHELOR, FACULTY OF COMPUTERS & ARTIFICIAL INTELLIGENCE

BENHA UNIVERSITY | 2019

INTERNSHIPS & COURSES

- FRONTEND WEB DEVELOPEMENT STACK | ITI JUN 2018 - SEP 2018
- CROSS-PLATFORM (ANDROID, IOS, WEB) APPS WITH IONIC & ANGULAR | UDEMY FEB 2022 - MAR 2022
- ANDROID NANODEGREE | NEXT TECHNOLOGY LEADERS, TIEC JAN 2018 - JUL 2018

SKILLS

Frontend: Angular, React, Angular Material, RXJS, HTML5, CSS3, SASS, Bootstrap, Tailwind

Mobile: Ionic (Angular), Capacitor, Cordova

State & Architecture: NGRX, Signal Store, Redux, Signals, Component Architecture, Modular Design

APIs & Backend Integration: REST APIs, Firebase, Payment Gateways, WebSockets, Pusher

Tools & DevOps: Git/GitHub, Webpack, Capacitor CLI, App Store & Play Store Deployment

Programming: TypeScript, JavaScript, OOP, Data Structure

PROJECTS

ATOM CME — LOW-CODE WORKFLOW/BUILDER PLATFORM

(Angular, RxJS, Module Federation, Keycloak, NGXS, PrimeNG, REST APIs)

- Built a low-code builder UI (drag/drop flow editing + Monaco-based configuration).
- Delivered a micro-frontend suite (host + workflow/builder/reporting remotes) via Module Federation.
- Integrated secure access with Keycloak (tokens/refresh, roles, route guards).

ATOM PORTAL — OPERATOR-FACING WEB PLATFORM

(Angular, RxJS, Micro Frontends, Module Federation, SignalR, REST API, Role-Based Access)

- Built the operator portal for a low-code builder platform.
- Delivered micro-frontends using Module Federation.
- Added real-time updates with SignalR and RxJS.

DYNE APP — CROSS-PLATFORM DINING EXPERIENCE

(Angular, RxJS, Pusher, Payment Gateways, Ionic, Capacitor, REST API)

- Developed core mobile features (iOS/Android) including reservations, orders, cart flow, live updates, and multi-method payments.
- Implemented real-time interactions using Pusher, improving responsiveness during ordering & checkout.
- Optimized performance (lazy loading, caching, module optimizations), reducing loading time and improving UI smoothness.

DYNE DASHBOARD — MULTI-MODULE OPERATIONAL DASHBOARD

(Angular, Angular Material, Signals, RxJS, Pusher, REST API, Bootstrap)

- Built a scalable admin dashboard allowing restaurants to control all operational modules in real time.
- Implemented reusable components, advanced filtering, and fast data visualization.
- Integrated real-time updates to reflect live order and operations status.

E-خدمات — GOVERNMENT SERVICES PLATFORMS

(Angular, Ionic, Capacitor, RxJS, FCM, REST API)

- Developed cross-platform mobile apps for project tracking, service submissions, and digital workflows.
- Implemented dashboards, project statistics, user flows, and offline-ready features.
- Ensured stable performance across Android & iOS and handled store deployments.

ISCOPE INSPECTION — FIELD INSPECTION MOBILE APP

(Angular, Ionic, Capacitor, Cordova, RxJS, FCM, REST API)

- Developed modules for field inspections, on-site data entry, and media capture.
- Integrated native device features (camera, file storage, offline caching) to support field environments.
- Improved workflow speed by optimizing form rendering and reducing UI latency across devices.

ISCOPE REPORT — PROJECT STATUS & REPORTING PLATFORM

(Angular, Ionic, Capacitor, Cordova, RxJS, FCM, REST API)

- Built features for reporting, project monitoring, and viewing detailed statistics.
- Implemented structured navigation and fast-loading data views for large project datasets.
- Ensured stable performance and compatibility across Android & iOS, including store deployment.
